

PERSEPHONE VISION

PERSEPHONE is targeting to design and deploy an innovative IT ecosystem for motivating end-users' behavioural changes towards the adoption of energy efficient lifestyles, building upon the evolvments in the Internet of Things, Data Modelling and Analysis and Recommendation and Gamification eras.

PERSEPHONE at a Glance

START: MAY 2019

DURATION: 24 MONTHS

PROGRAMME:

ENTERPRISES/0618/0167; SMART GROWTH - RESEARCH IN ENTERPRISES - RESTART 2016 – 2020

OBJECTIVE: BUILDING ENERGY EFFICIENCY

BUDGET: €284.192

PERSEPHONE

Improve Energy Efficiency through Personalised Energy Management Services in Small Offices and Homes

<https://www.persephone-project.eu>

Project Innovation and Originality

- ❖ design and implementation of scalable sensor data monitoring mechanisms
- ❖ conceptualization of descriptive behavioural models
- ❖ design and development of big data analytics mechanisms
- ❖ design and development of a user-friendly rule-based management system
- ❖ collection of continuous feedback from the end users through mobile crowdsensing mechanism
- ❖ provision of an easily deployable and manageable IT ecosystem
- ❖ design and development of a set of personalised applications and games
